- 53.3 If the *Contractor* does not provide such evidence or during the currency of the contract the *Contractor* ceases to possess a CIS Registration or the *Contractor* breaches any of the requirements of the Construction Industry Scheme, this constitutes a substantial failure to comply with the contract which entitles the *Client* to terminate the contract for breach by the *Contractor*.

## 6. COMPENSATION EVENTS

### Compensation events

60

60.1 The following events are compensation events in each case save and to the extent that the relevant event is caused or contributed to by any default whether by act or omission of the *Contractor* or its servants, agents or subcontractors either under the contract or under any other contract entered into by the *Client* and the *Contractor*.

(1) The *Client* gives an instruction changing the Scope unless the change is in order to make a Defect acceptable.

(2) The *Client* does not allow access to and use of the *site* to the *Contractor* as necessary for the work included in the contract (at all times subject to any restrictions to such access stated in the contract including the Scope).

(3) The *Client* does not provide something which it is to provide by the date stated in the contract.

(4) The *Client* gives an instruction to stop or not to start any work.

(6) The *Client* does not reply to a communication from the *Contractor* within the period required by the contract.

(7) The *Client* changes a decision which it has previously communicated to the *Contractor*.

(7A) The *Client* instructs the *Contractor* to search for a Defect and no Defect is found unless the search is needed only because the *Contractor* gave insufficient notice of doing work obstructing a required test or inspection.

(8) The *Contractor* encounters physical conditions which

- are within the *site*,
- are not weather conditions and
- an experienced contractor would have judged, at the date of the contract, to have such a small chance of occurring that it would have been unreasonable to have allowed for them.

Only the difference between the physical conditions encountered and those for which it would have been reasonable to have allowed is taken into account in assessing a compensation event.

(9) A *weather measurement* is recorded

- within a calendar month,
- before the Completion Date for the whole of the *works* and
- at the place stated in the Contract Data,

the value of which, by comparison with the *weather data*, is shown to occur on average less frequently than once in every ten years.

Only the difference between the *weather measurement* and the weather which the *weather data* show to occur on average less frequently than once in ten years is taken into account in assessing a compensation event.

(10) The *Client* notifies the *Contractor* of a correction to an assumption made for the assessment of a compensation event.

(11) A Prevention Event occurs.

- 60.2 In judging the physical conditions for the purposes of assessing any compensation event, the *Contractor* is assumed to have taken into account
- the Site Information,
  - publicly available information referred to in the Site Information,
  - information obtainable from a visual inspection of the *site* and
  - other information which an experienced contractor could reasonably be expected to have or to obtain.

---

**Notifying  
compensation  
events**

**61**

- 61.1 The *Client* and the *Contractor* notify the other of an event which has happened or which they expect to happen as a compensation event.
- 61.2 If the *Client* notifies the compensation event, it also instructs the *Contractor* to submit a quotation for the compensation event. The *Contractor* submits the quotation within one week of being instructed to do so by the *Client*. If the *Contractor* notifies the compensation event, it submits a quotation with the notification.
- 61.3 If the *Contractor* does not notify a compensation event within four weeks of becoming aware that the event has happened, the Prices and Completion Date are not changed unless the event arises from a correction to an assumption stated by the *Client* or the *Client* giving an instruction or changing an earlier decision.
- 61.3A If the *Client* decides that the *Contractor* did not give an early warning of the event which the *Contractor* could have given, the *Client* notifies that decision to the *Contractor* when instructing the *Contractor* to submit a quotation.
- 61.4 A compensation event is not notified by the *Client* or *Contractor* after the issue of the Defects Certificate.

---

**Quotations for  
compensation  
events**

**62**

- 62.1 A quotation for a compensation event comprises proposed changes to the Prices and Completion Date assessed by the *Contractor*. The *Contractor* submits details of its assessment with each quotation. If the effects of a compensation event are too uncertain to be forecast reasonably, the *Contractor* states assumptions about the compensation event in the quotation. Assessment of the compensation event is based on these assumptions. If any of them is later found to have been wrong, either Party may notify a correction to the other Party.
- 62.2 The *Client* replies within two weeks of the *Contractor's* submission. If and to the extent that the *Client* decides that an event notified by the *Contractor*
- arises from or is contributed to by a fault of the *Contractor*,
  - has not happened and is not expected to happen,
  - has not been notified within the timescales set out in these *conditions of contract* or
  - is not one of the compensation events stated in the contract
- the *Client* notifies the *Contractor* that the Prices and Completion Date are not to be changed.
- If the *Client* decides otherwise, it notifies the *Contractor* accordingly and includes in the notice
- acceptance of the *Contractor's* quotation or
  - a statement that it does not agree with the quotation and details of the *Client's* own assessment.
- 62.3 Not used.

- 62.4 If the *Contractor* does not provide a quotation which the contract requires it to submit in the time allowed, the *Client* assesses the compensation event and notifies the *Contractor* of the *Client's* assessment within one week of when it should have received the *Contractor's* quotation.
- 62.5 The *Client* includes details of its assessment of a compensation event when it notifies the *Contractor* of the assessment. If the effects of the compensation event are too uncertain to be forecast reasonably, the *Client* states assumptions about the compensation event in the assessment. Assessment of the compensation event is based on these assumptions. If any of them is later found to have been wrong, either Party may notify a correction to the other Party.

---

**Assessing  
compensation  
events**

**63**

- 63.1 For a compensation event which only affects the quantities of work shown in the Price List, the change to the Prices is assessed by multiplying the changed quantities of work by the appropriate rates in the Price List as calculated at the *Client's* discretion.
- 63.2 For other compensation events, the change to the Prices is assessed as the effect of the compensation event upon
- the cost of the work already done,
  - the cost of the work not yet done and
  - the resulting Fee.
- 63.3 Without prejudice to clause 63.4, the *Client* and the *Contractor* may agree rates or lump sums to assess the change to the Prices.
- 63.4 The effect of a compensation event upon cost in accordance with clause 63.2 is at the *Client's* discretion calculated
- using like for like rates including using rates agreed in respect of any other Scheme or contract,
  - using Defined Cost,
  - following open market or competitive tender, or
  - using an amount agreed by the Parties as being a reasonable amount representing payments made by the *Contractor* for the relevant item.
- 63.5 Not used.
- 63.6 A delay to the Completion Date is assessed as the length of time that, due to the compensation event, Completion is forecast to be delayed.
- 63.7 An assessment of the effect of a compensation event made using Defined Cost
- includes risk allowances for cost and time for matters which have a significant chance of occurring and are not compensation events and
  - is based upon the assumptions that
    - the *Contractor* reacts competently and promptly to the event and
    - any additional Defined Cost and time due to the event are reasonably incurred.
- 63.8 If the *Client* has decided and notified the *Contractor* that the *Contractor* did not give an early warning of a compensation event which an experienced contractor would have given, the event is assessed as if the *Contractor* had given early warning.
- 63.9 Assessments for changed Prices for compensation events are in the form of changes to the Price List.
- 63.10 If
- the *Client* has accepted a *Contractor's* quotation,

- a *Contractor's* quotation is treated as accepted or
- the *Client* has notified the *Contractor* of a *Client's* own assessment

for a compensation event, the assessment of that compensation event is not revised except as stated in these *conditions of contract*.

- 63.11 Without prejudice to any other of its rights or remedies, the *Client* is entitled to procure the provision of omitted work from any other person without any liability to the *Contractor* (including under the contract, under common law or otherwise) in respect of loss of anticipated profit, loss of contracts, consequential or economic losses or any other losses and expenses.
